Your Time And Energy Are Too Valuable To Waste

Thycotic gives you the agility to stay one step ahead. No more manual provisioning or cumbersome password management. No more combing through audit logs to create reports. You'll be able to answer questions from executives and auditors before they are asked.

Thycotic Helps You Get People On Your Side

Our solutions are readily adopted by security teams, IT Ops, Sys Admins, helpdesk/support teams, developers, and everyone who relies on privileged access to do their job.

Why Privileged Access Management Should Be Your #1 Cyber Security Priority

Privileged account credentials for domain admins, service, application, and root accounts are valuable targets. When attackers gain these credentials they can exploit your most sensitive information and critical systems.

Privileged access gives them power to alter data, change configurations or even shut down your operations. Masquerading as privileged users, they can cover their tracks and go undetected for months or longer.

GARTNER INSIGHTS

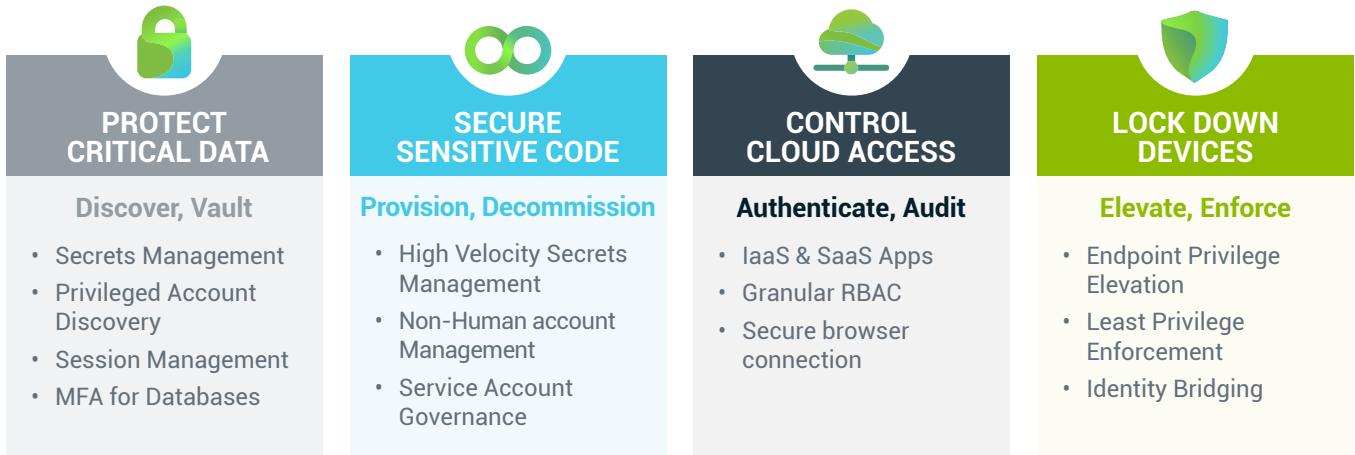

PAM should be a security team's #1 priority

FORRESTER

PAM can reduce the risk of a breach by 80%

GARTNER BEST PRACTICES FOR PAM

PAM lowers the risk of advanced threats by 50%

 **SECRET SERVER**

Discover, manage, protect, and audit privileged access

- Establish a Secure Vault
- Discover Unknown Accounts
- Delegate Access
- Manage Secrets
- Control Sessions

 **ACCOUNT LIFE-CYCLE MANAGER**

Control and manage service account governance

- Establish Workflow
- Delegate Ownership
- Provision Service Accounts
- Enforce Governance
- Decommission Accounts

 **CLOUD ACCESS CONTROLLER**

Secure any web-based applications

- Apply Granular RBAC
- Hide Sensitive Data
- Secure Legacy Apps
- Protect Social Media
- Limit URL Access

 **PRIVILEGE MANAGER**

Implement endpoint application control

- Deploy Agents
- Manage Accounts
- Define Policies
- Elevate Applications
- Improve Productivity

 **CONNECTION MANAGER**

Ensure unified management of remote sessions

- Establish Remote Access
- Manage Sessions
- Centralize Control
- Record Sessions
- Track & Audit

 **DEVOPS SECRETS VAULT**

Protect the secrets that DevOps teams and RPA tools need

- Establish Vault
- Centralize Secrets
- Automate & Scale
- Manage Secrets
- Issue Certificates

 **REMOTE ACCESS CONTROLLER**

Secure remote access, enforce zero trust for remote workers

- Restrict SSH Commands
- Secure RDP & SSH
- Access Containers
- Record Sessions
- Audit Activity

 **IDENTITY BRIDGE**

Centralize authentication and authorization for Unix and Linux

- Join Unix/Linux to AD
- Enable Kerberos SSO
- Consolidate User/Group Data
- Simplify User Experience
- Centralize Access Control

 **PRIVILEGED BEHAVIOR ANALYTICS**

Integrate enhanced reporting, threat detection, and incident response

- Secure Accounts
- Establish Baselines
- Monitor & Identify
- Alert
- Take Action

 **DATABASE ACCESS CONTROLLER**

Centralize connection security for databases

- Secure Databases
- Manage Privileged Users
- Audit Access
- Modernize MFA
- Proxy Connections
